

RETRACTED: Putative mechanisms for climate resilience in Morocco's *Argania spinosa*: A characterization of drought-induced antioxidant properties

The Editor-in-Chief and the Publisher have retracted this article. The article was accepted as a Research Article in Environment Conservation Journal. During the online first version, the Editor-in-Chief was contacted regarding the fake/manipulated dataset documented in this article.

Post publication enquiry was conducted during which Author SOUMYAJIT KOLEY failed to provide the raw data and address the issues raised by the learned reader. Upon further investigations, it was also observed that the affiliation provided in this paper was also found incorrect as the institute denies any association with the author from 2012. The Editor-in-Chief has no longer confidence in the results presented in this article and thereby reaches the decision to Retract with immediate effect.

The manuscript has been removed with full knowledge of the authors Soumyajit Koley.
